

Important message to parents regarding planned interdisciplinary assessments at the State Diagnostic and Counselling Centre, during Covid-19

To reduce risk of infection, we have put the following regulations into place:

- That parents and child/adolescent show up **at the scheduled time**
- That parents and child/adolescent do **not** come to the reception desk, but **wait in the waiting room** until a specialist comes and gets them
- That the child/adolescent's siblings do not come with them
- That only one parent accompanies the child/adolescent, unless the appointment is a consultation with parents
- That the utmost hygiene is ensured and that parents and child/adolescent wash and sanitize their hands as soon as they enter the building
- That a 2-meter distance is kept between people whenever possible
- No handshaking when greeting
- **Very important:** Please **do not come to your scheduled appointment** at the State Diagnostic and Counselling Centre if parents or child/adolescent have experienced **any symptoms** that could indicate a Covid-19 infection, such as flu or cold symptoms, bone pain, fever, dry cough, or the loss of taste and smell. Instead, please call 510-8400 to receive more detailed information and to reschedule. **Should an employee become aware of a parent or child/adolescent coming to an appointment with any of these symptoms, they will be sent home and the appointment will be postponed.**
